## Summary:

As a school, we noticed a larger percentage of students achieve benchmark or higher on Acadience in fy23. We also noticed a growth in the proficiency of our ML students. When looking at grade-level bands from one year to the next (color coded following student groups) we noticed an increase in proficiency for all groups except for students in kindergarten moving into first grade.

## Need:

- Have our ML population percentages mirror our whole school percentages (if the whole school is $72 \%$ proficient how can we get $72 \%$ of our ML population to also be proficient?)
$\bullet$

## fy24 Goal(s):

- Schoolwide proficiency growth of 3\% - from $72 \%$ to $75 \%$.
- ML proficiency growth of $9 \%$ - from $51 \%$ to $60 \%$.

|  | Summary: <br> There appears to be a lot more mobility in the younger grades than there is in the upper grades. There is a very small number of students who are dropping to lower benchmark levels. Our below (yellow) students are able to make more progress than our well below (red) students. It looks like the older students get, the higher their chances of remaining well below (red) are. <br> Need: <br> - Understand who is not making progress (ML, IEP students, Gen Ed) and why <br> - How can we help our well below (red) students to move up to below, or benchmark? <br> - We need to find growth in students who are below or well below while maintaining growth in our students who are at or above benchmark. <br> fy24 Goal(s): Consistently progress monitor students at the appropriate rate and use the data to determine instructional needs. Based on data, students will receive the appropriate targeted instruction in tier 2/3 times. |  |  |  |  |  |  |  |  |

## Growth

fy24 Goal(s): As a school we will increase our percentage of students passing Math RISE from 48\% to 50\%

- Increase our percentage of students with IEPs passing the Math RISE test from $13 \%$ to $18 \%$.
- Increase our percentage of ML students passing the Math RISE test from $10 \%$ to $15 \%$.

GM: Our goal during fy23 was: $67 \%$ of our students (including ELs and students with IEPs) will be on or above grade level based on the Middle of the Year benchmark on Into Math Growth Measure Assessment and 70\% of our students will be on or above grade level on the End of the Year Growth Measure Assessment.

Summary:

Need:

- We see that we need to focus more on meeting the needs of our ML students in order for them to make adequate growth each year
fy24 Goal(s): $70 \%$ of ELs will show growth on their WIDA ACCESS score.

## Increase Parent Volunteers

- More involvement with PTA - parents and teachers
- Have a fifth grade teacher represent teachers at each meeting (timing aligns with their prep time)
- Film the PTA meetings and send them out in the weekly email
- Re-introduce a room Parent program for each teacher...that parents is the liaison between teacher and PTA
- Work on a volunteer plan with teachers so they are ready for parent volunteers

|  | - PTA sign-ups at Breakfast with the Principal/Back to School Night/Parent Teacher Conferences <br> - Incentivize parents coming to volunteer/helping with classroom activities? <br> - Sending parents time for additional support in the classroom where they would be needed. ## Summary:

Our caucasian and other ethnicity students have very similar data. Our female population is performing better than our male population.

Need:

- How do we help our kindergarten and first grade students transition to school behaviors?
- Implement a Kindergarten jump start program to teach/review procedures with students and parents before the school year begins.
fy24 Goal(s): Improve behavior in kindergarten students from Poor to Excellent.
